Subject: RE: Aerojet Area 40 RAP - Finalized - August 27, 2018

Ok, thanks, Alex! Yes, maybe we could reschedule this RAP follow-up discussion to a time when you can help Pete respond to the CAG comments; I think that would really help. Can you reach out to Pete or Janice and let them know you can support the discussion? I think the CAG would really appreciate you weighing in on this.

Not sure on the PCD requirement on new OUs; that's the first I've heard of it. I'll look into it; my attorney is out another couple weeks though. Most sites don't have any sort of PCD outlining new OU creation procedures, but Aerojet is a unicorn as we all know ☺

Regarding the tech meeting schedule, I thought Chris took exception to the idea that they should last more than one day, so as far as I know everything will be covered on Weds. I'm waiting on a schedule though from AR to confirm.

Thanks, and have a great trip!

Lynn

Thanks, Lynn. I am not putting any negative things on you for this. I support you 100\% on this one. I was just joking on my e-mail. It should be a DTSC presentation. I do have some trepidation in having DTSC do it - particularly after reading the notes on the CAG meeting. I feel it would have gone better if I stepped up.

We will need to discuss this OUI1 stuff -as I have not be cognizant of its establishment, what is for, or how it is going to work. As this has not formally been proposed and accepted according to the PCD, it does not yet officially exist. I need to know more before I can say I support the idea.

As for my trip with my daughter (and wife) we go down on Thursday to move her into her house and drive back on Friday.

See you at our meetings. Are we going to have a Tuesday afternoon meeting to go along with our Wednesday meeting. Sounds like Daewon is hoping that would occur so that Wednesday could be focused on groundwater. Could make it around 1:30 or maybe a little earlier on Tuesday afternoon.

Take care, Alex

Unfortunate timing; had DTSC/CAG known further in advance that they couldn't make this Sept CAG meeting date, we could have moved it to another date since the RAP was just finalized and the CAG would likely want to discuss. I'm happy to facilitate PP/ROD meetings, but I shouldn't be the one leading discussion on the RAP RTCs and such since the RAP isn't part of EPA's CERCLA process.

Hope you have a good weekend and trip with your daughter, Alex,
Lynn

> I am sure they will have a good weekend after that note. I will not be there either as I am taking my daughter back to school and will need to be getting things ready that evening. Could be a short meeting. I was going to make it, but my daughter has to be at a mandatory meeting for work down in San Diego on Friday morning.

I would need to meet with Pete to try to prepare a presentation for the CAG. As such, I will see if Pete and I can get together to provide me with the information that I would need to try to present any changes in the Area 40 RAP. At this time, with Pete not being available for the upcoming CAG, it could be better if the EPA project manager or Aerojet provide the presentation.

>> Hello Jim,

>> Pete let me know that he would not be available to attend next Wednesday evening's meeting of the Aerojet CAG. I know that this has not been a part of your duties, but since the RAP on Area 40 was finalized on August 27 I'm wondering if you could present to the CAG the areas of the RAP that have been changed since it was released at the end of April, as per the letter supplied to Aerojet. (And anything not listed that could be considered an important component of the finalized RAP.) I would explain to CAG attendees that further discussion regarding the changes (or lack of changes) to the RAP would need to be carried out at the November meeting when hopefully Pete could be present, but at least CAG members could be updated as to the results of their comments.

>> I'm hoping to finalize the agenda later today, so please let me know your thoughts on this idea!
